PRESS RELEASE

videoNEXT Launches Free IP Surveillance Software on the iPhone

CAVU, CAVU PRO and CAVU FREE Now Available on Apple's App Store

Chantilly, Virginia – August 12, 2009 – [videoNEXT](http://www.videoNEXT.com), developer of leading-edge surveillance software and physical security information management (PSIM) solutions, today announced the availability of its mobile video apps in the [Apple® App Store](http://www.apple.com/appstore)SM for iPhone™ and iPod touch® handheld devices. videoNEXT's new CAVU, CAVU FREE and CAVU PRO provide large organizations, small businesses and consumers with remote video monitoring features over 3G and Wifi networks anywhere.

The CAVU family of mobile surveillance solutions brings videoNEXT's proven video surveillance application, [Security Knowledge Manager \(SKM\)](http://www.videoNEXT.com), to Apple's innovative mobile devices. CAVU is available in three versions:

- **CAVU FREE** – allows users to directly connect to IP cameras (Axis and Panasonic BB & BL Series) and monitor them remotely. Cost: None.
- **CAVU** – connects to any of videoNEXT's SKM video management solutions (SKM-Cirrus, SKM-Stratus and SKM-Altus). Provides a live camera matrix; live full screen video with pan, tilt and zoom controls; playback of recorded video from any camera; a real-time alarm/event log with video playback; and alarm acknowledgment. Cost: \$19.99.
- **CAVU PRO** – includes features of CAVU, plus multi-server capability. It uses the iPhone's camera to stream live video back to any SKM-video management system. CAVU PRO also offers GPS position tracking on Google Earth maps and allows the use of pan-tilt-zoom pre-sets. Cost: \$49.99.

"Our CAVU offerings are the top mobile surveillance applications available at the Apple App Store. They are the most comprehensive surveillance and security applications available on Apple's iPhone and iPod touch today," said Andriy Fomenko, vice president & chief technology officer for videoNEXT. "The iPhone is an ideal mobile platform for viewing your security cameras, and our two-way streaming of video is nothing short of ground breaking."

-more-

“We are excited to offer our powerful video surveillance solutions to iPhone and iPod touch users,” said Chris Gettings, president & CEO for videoNEXT. “It is very powerful and valuable to view live and archived video, control cameras and receive alarms and real-time event video from your home or business on your iPhone. The visibility is clear with CAVU.”

videoNEXT's SKM is an open, standards-based software solution that works with nearly any IP, digital or analog camera, runs on any Intel or compatible server and uses an organization's existing security and data infrastructure in new and powerful ways. It provides the easiest and most scalable IP surveillance and physical security information management solution available today. Combining this with full policy-level administration and its unique flexible high availability Storage Volume Manager – organizations now have a highly capable, powerful, scalable and easy-to-use physical security information management tool that truly synchronizes security. videoNEXT SKM is offered in three levels: [SKM-Altus](#) for enterprises, [SKM-Stratus](#) for mid tier features and [SKM-Cirrus](#) for the consumer market.

CAVU and CAVU PRO require SKM-Cirrus to manage the video. This consumer video management system is a proven and cost-effective solution that operates on the Mac® platform. It can be purchased and downloaded from www.cavu.me. This website provides information on all the features and benefits of the product, FAQs, a quick-start guide, as well as instructions on how to simplify security using Apple and videoNEXT innovations.

About videoNEXT

[videoNEXT](#) is a leading developer of Physical Security Information Management (PSIM) solutions for small businesses, commercial enterprise and government organizations with installations worldwide. With innovative software and unparalleled customer support, videoNEXT offers a simple, scalable platform to unify and manage physical security components. The growing suite of videoNEXT software includes Network Video Recording (NVR)/PSIM platforms: SKM-Stratus, SKM-Altus, SKM-Cirrus; and expansion modules including: v-AC (access control module), v-MX (video wall offering), v-IQ (video analytics), v-PS (point of sale module) and CAVU (the premiere mobile solution). Founded in 2002, the company is headquartered in metropolitan Washington, D.C.
